About TaxCloud

TaxCloud is a product-led software company dedicated to simplifying the complex world of sales tax for online businesses. Our platform empowers companies to calculate and submit sales tax effortlessly across various jurisdictions, including states, counties, municipalities, and special tax districts. As we continue to grow, we seek an experienced Software Engineer to help accelerate our mission.

Key Responsibilities

Software Development:

- Collaborate with cross-functional teams to understand customer requirements and translate them into high-quality, scalable software solutions within our variety of services and codebases.
- Enhance and optimize our existing systems, including the primary backend server, Microsoft SQL database, and modern Angular 2 frontend application.
- Help build, deploy, and maintain our new services layered into our existing stack and infrastructure using a highly iterative delivery approach.

Quality Assurance and Best Practices:

- Promote and uphold best practices for code quality, testing, and documentation, fostering a culture of excellence within the development team.
- Participate in code reviews to ensure adherence to coding standards and maintain a high code quality level.

Technical Problem-Solving and Innovation:

- Apply strong problem-solving skills to address technical challenges promptly, contributing to resolving production issues.
- Stay current with industry trends, tools, and technologies, and provide recommendations for platform improvements and innovations.

Collaboration and Support:

- Work collaboratively with the team to support production issues and contribute to timely issue resolution.

Technical Qualifications

- Proficient in 2-3 programming languages and web frameworks.
- Proficient in SQL (any flavor will do).
- Proficient in Git and history using GitHub/GitLab/Bitbucket.
- Familiarity with Javascript and/or Typescript.
- Familiarity with NoSQL datastores, specifically document based.
- Experience using CI/CD pipelines for automated deployment.
- Experience using a cloud provider like Azure/AWS/GCP is a plus.
- Experience with IAC tools like terraform, bicep, etc. is a plus
- Experience with eCommerce, sales tax, or ERP applications is a plus.

Other Qualifications

- Strong problem-solving skills.
- Proactive approach to addressing technical challenges.
- Excellent communication skills.
- Humble and open-minded.
- Ability to work independently and collaboratively as a team.
- Willingness to embrace change.
- Eagerness to learn, adapt, and stay up-to-date with emerging technologies.

Benefits:

- Key role on the engineering team at a fast-growing company.
- An opportunity to learn from other Camber Portfolio companies.
- Competitive salary and employer-sponsored health care plan.
- Flexible work location.
- 401K.

TaxCloud is committed to creating a diverse environment and is proud to be an equal-opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.
